**NOTE:**

This is intended to be installed using only the appropriate countersinking tool and screw system as provided in the Melton SLM sample pack. All blocking, fasteners, and sealants to be provided by installer.

**2" MIN. EDGE DISTANCE**

1" to 1 1/2" in cold to moderate weather, allow 1/8" at joint for expansion.

**ATTACHMENT FRAMING TO BE SINKED OR NOTCHED AT LAP JOINTS (TYP.)**

1/2" countersunk stainless steel pan head screws.

Apply adhesive/sealant, color matched or paintable if desired, to lap joint prior to installation. (Sealants supplied by installer)

Use color coated screws as supplied by Melton. If concealed screw heads are desired, installer to apply a clear coat of colored caulking to each screw head (TYP.).
